Someron Bakuli

has successfully completed the online, non-credit Specialization

Machine Learning with TensorFlow on Google Cloud Platform

This five-course online specialization teaches course participants how to write distributed machine learning models that scale in Tensorflow, scale out the training of those models. and offer high-performance predictions. Also featured is the conversion of raw data to features in a way that allows ML to learn important characteristics from the data and bring human insight to bear on the problem. It also teaches how to incorporate the right mix of parameters that yields accurate, generalized models and knowledge of the theory to solve specific types of ML problems. Course participants experimented with end-to-end ML, starting from building an ML-focused strategy and progressing into model training, optimization, and productionalization with hands-on labs using Google Cloud Platform.

# Course Certificates

Earned after completing each course in the Specialization

Launching into Machine Learning

Google Cloud
Taught by: Google Cloud Training
Completed by: Someron Bakuli by June 1, 2019
5 - 7 hours per week
Grade Achieved: 94.94%

View this certificate ›

Intro to TensorFlow

Google Cloud
Taught by: Google Cloud Training
Completed by: Someron Bakuli by June 20, 2019
2-3 weeks of study, 8-10 hours/week
Grade Achieved: 98.33%
